

I am employed by a large pharmaceutical firm and as such see a lot of nationwide driving. My co-driver and I benefit from and depend on XM Satellite Radio and its traffic and weather channels for information. Satellite radio provides variety and quality that is not available elsewhere. We pay for these services and it should not be up to the National Association of Broadcasters to dictate what we are permitted to hear. Therefore, we respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we demand and deserve.
